

	Agency Mitigation Measures		
Area	State/Local	Other Federal	GSA
No-Action Alternative			
Biological Resources	None Recommended	None Recommended	Continue stewardship of endangered skullcaps in consultation with State and Federal resource agencies. Before any transfer, consult with FWS, TWRA, and Division of Natural Heritage to identify critical habitat, State and Federally listed or threatened species and institute mitigation as appropriate. Institute kudzu control program.
Disposal Alternative			
Surface Water (Scenario A, B, C and D)	Provide enforcement of State and local regulations for storm water management including detention, sedimentation and erosion control and pollution prevention requirements. Consider development of storm water management measures by site drainage basins. Identify floodplains and wetlands; obtain proper permits and approvals as part of site planning process prior to development.	Review permit applications and issue permits for development as required	Delineate wetlands and floodplains as necessary.
(Scenario C)	Institute zoning controls and enforcement for management of equestrian waste.	None Recommended	None Recommended
Biological Resources (Scenarios A, B, C and D)	Consult with State and Federal Agencies to determine existence of threatened or endangered species and develop mitigation plans.	<u>U.S. Department of the Army and U.S. Fish and Wildlife Service.</u> Develop Memorandum of Agreement (MOA) regarding appropriate procedures to protect endangered skullcap population*	Assist U.S. Department of Army in developing MOA for protection of endangered skullcap in consultation with appropriate agencies. Consult with TWRA and TN Division of Natural Heritage on endangered and threatened species*
